

Fire Safety Solutions Canada Ltd. is looking for candidates to perform the following duties:

Sprinkler Fitter

Location: Onsite - 30 Macintosh, Unit #1, Concord ON, L4K 4P1

Job Description:

We are seeking a skilled Sprinkler Fitter to join our team to install, test, and maintain sprinkler systems, and to keep them functioning at their highest capacity for the purpose of creating functionality and longevity.

To communicate potential problems to clients before they arise to allow them to ensure exceptional customer service and brand recognition.

Company Values:

- Pride
- Professionalism
- Perseverance
- Accountability
- Integrity
- Teamwork

Deliverables:

- Completion of inspections on time and communication of deficiency repairs before leaving the site.
 - We pride ourselves on allowing the right amount of time to test and maintain our clients' systems properly. However, we must meet deadlines for testing.
 - Communicate any urgent deficiencies before departing the site during the client closeout meeting. Explaining and guiding the client through repairs that will show up on their reports.
 - Be punctual.
- Completion of construction milestones for installation, commissioning, and testing
 - Read and understand the scope prior to the commencement of the project. Review with the design and construction supervisor.
 - Review the material list for the job to ensure parts will be available to execute the scope.
 - Communicate any parts missing in order to complete rack up and commissioning.
 - Communicate all issues with specification and work scope prior to executing. Identify extras to the sales team in order to ensure that there is no "scope drift".
- Ensure you have all required materials for the job by communicating job needs to the operations team.
 - Check your work orders and material lists before leaving the shop Monday morning to ensure you are prepared for the week.
 - Communicate immediately to the client and operations team any changes to scope or extras required on work orders when in the field.

- Daily updates to iFLEET work order management system
 - All information must be TEXT CLOSED on iFLEET at the completion of the day and the completion of the job. (a)Will you complete the job? If you are not complete, what is left over? (b)Were there any issues on site we should be aware of? (c)Were there any extras to the scope found while on-site? (d)Were there parts used from stock that are outside of the listed material? (e)Is there a lift that requires pick-up?
 - Ensure job exceptions are closed correctly and paperwork is updated.
 - Liaise between client and supervisor.

- Bring your job to completion
 - Be solution-based and work to complete the job in the time assigned.
 - Understand daily work completion targets and achieve them.
 - Identify extras or items that are out of scope to keep jobs on track and provide additional opportunities to expand work scope.

Skill Set & Experience Needed:

- Journeyman sprinkler fitter licensed to work in Ontario.
- Service experience an asset

ROP: \$56.16/hour

Note: We highly encourage applications from people with disabilities.
